Numb. 2117

The London Gazette.

COLLEGE of ARMS.

Published by Authority.

From Monday March 1. to Thursday March 4. 1685.

Naples, Febr. 13.

THE last week arrived here a Vessel from *Spain* with 250 new raised Men to recruit the *Spanish* Regiments in the Service of this Kingdom. The new Fort in the Province of *Abruzzo*, is quite finished, and provided with a good Garison, so that those Parts will be secured for the future against the Incursions of the Banditi.

Genoua, Febr. 19. This week arrived here a Felucca from *Cagliari*, the Master whereof informs us, That the Count *de Fuensalida*, Viceroy of *Sardinia*, had given Orders for the fitting out two Gallies, which are to transport him and his Family hither; From hence he will go to *Milan*, being to succeed in that Government the Count *de Melgar*, whom the King of *Spain* has appointed his Ambassador to the Pope. They write from *Turin*, that the Duke of *Savoy* had ordered five Regiments of Foot, one of Dragoons, and four Troops of Gensdarmes, to march towards the Valley of *Lucerne*. This week arrived here the *Golden Fleece* and the *Rainbow* from *Leghorne*, to lade for *Spain*.

Venice, Jan. 23. Three Regiments of Foot, and 500 Dragoons of the Troops of the *Milaneze* are arriv'd at the *Lido*, who, after having refreshed themselves in the Quarters assigned them by the Senate, will be transported to the Fleet; whither a great Convoy will be likewise sent the beginning of the next month, consisting in above 40 Ships laden with all sorts of Ammunition and Provisions, under the Command of Signior *Pietro Bembo*. By a Vessel arrived from the Coast of *Barbary*, we are informed, that the Grand Signior has commanded the Governments of *Argiers*, *Tunis*, and *Tripoli*, to send their Ships to the *Levant* early in the Spring to serve in his Fleet. The 10th Instant the Sieur *Renaldi* was received into the Body of the Nobility, he paying 100000 Crowns towards the War against the *Turk*.

Marseilles, Febr. 25. Yesterday arrived in this Port a Merchant Ship, in 17 days from *Smirna*, by which we have advice, that the *Turks* make great preparations for the War; And that they will have a very numerous Army in *Hungary* this Campagne, but composed, for the most part, of raw, undisciplined Men. That a Courier was arrived at *Adrianople* from the Prince of *Transilvania*, to inform the Grand Signior, that the *Imperialists* had by Force taken Winter-quarters within that Principality. And that the Sieur *Girardin*, Ambassador from *France*, arrived at *Constantinople* the 11th of the last month. Orders are come hither from the Court of *France*, for the building of several new Gallies.

Vienna, Febr. 21. The Duke of *Lorrain* is expected here about the middle of the next Month; and the Elector of *Bavaria* in the beginning of *April*: The Treaty with the Elector of *Saxony* is ratified; His Electoral Highness has promised to send with the Troops that are to serve against the *Turks*, a proportionable Train of Artillery, and has already given Orders for the providing a Magazine at *Raab*, and another at *Comorra* for their Subsistence. We are told that the Count *de Nostitz*, the Emperor's Minister at *Stockholme*, has made a Treaty with the King of *Sweden* for 100 6 Men, which are to serve this Campagne in *Hungary*. The Letters from *Upper Hungary* say, *Teckeley* was come to *Great Waradin*, and had been very well received there, but was very strictly observed by the *Turks*; That General *de Mercy* having notice that 4000 *Turks* were come to *Gyula*, had immediately drawn together the Troops quartered about *Zolnocke*, who marched to *Saravas*, and from thence towards *Gyula*, under the Command of Major General *Heussler*, and the Count *de Peterhasi*, but returned, without hearing any News of the Enemy. The Count *de Weissenwolfe* having surrendred his Government of the *Upper Austria*, the Emperor has given the same to the Count *de Lamberg*. The Electoral Prince Palatin will part from hence the 4th of the next Month, to return to *Dusseldorpe*, but the Archdutchess his Wife intends to remain here some time longer.

Vienna, Febr. 24. The last Letters from *Zolnocke*, confirm the news of *Teckeley's* arrival at *Waradin*; And tell us farther, that he had sent Circular Letters, wherein he stiles himself Prince of *Hungary* and *Transilvania*, to several Counties of the *Upper Hungary*, requiring the Nobility and the Towns to send Deputies to him to receive his Orders; And that these Letters were accompanied with others from the Bassa of *Great Waradin*, but that they had had no other effect, than to confirm the *Hungarians* in their Fidelity to his Imperial Majesty, of which they give every day fresh Testimonies. General *Caprara* having reinforced the Blockade of *Montgatz* with 4000 Men, has sent Lieutenant General *Caraffa* with 2500 *German* Horse, and 1500 Foot, and 2000 *Hungarians*, to join the Baron *de Mercy* at *Zolnocke*, that he may be in a condition to oppose the *Turks*, who seem to have a design upon some of our Quarters on that side The Advices from the *Turkish* Territories, say they make great Preparations for the Campagne; That the Garisons of *Buda* and *Agria* have been lately reinforced, and supplied with Provisions and Ammunition; and that there is now in the last of these places 4000 Men, who expect to be attackt at the opening of the Camp, and are therefore putting themselves into the best posture of defence they can. The Deputies of *Transilvania* are preparing for their departure; We do not hear that they have concluded any thing concerning the Alliance that was proposed,

to
